# 1. Web Page structure

The structure we will make of the web page will be divided into different parts. Each of them will be in a navigation bar to be able to switch between them.

First there will be the main page:

The main page will consist of the Cover page of the web page. Our latest product will be displayed there with an image and options to purchase.

Right after, you will see another featured product from our website.

Finally, there will be a slide showing various keyboards and information about our company, such as: location, copyright, licenses, who we are...

Keyboards

In this section of keyboards we will present our catalog of keyboards, the page will be structured as follows: at the top on the left side we will find the photo of the keyboard and on the right the name, price and its description. Finally we have a box where the purchase of the product can be made.

Support

In the support part, we will have 3 boxes which will be images and text showing the 3 ways we support our customers. When any of these boxes is touched, it will take the user to that specific point of the webpage. In the different parts there's information about it like: our address, email, phone number…

FAQS

In the FAQS section we will find information on the most frequent questions from customers, the structure of the web page will be as we see below: on the top left we will find the last date when there was any modification on the web, after we will have an index where all the sections will appear and we will have the option of choosing any section. Once inside any section we will find a question and its answer below.

Page Edu

This page is the staff of each worker, it will be structured with a photo of the worker above on the left and on the right the name and description of the worker where we will include the title and functions within the company, below the photo we will have a table where the client can classify the worker's work and put a comment. Below everything we will have the worker's personal comment where we can get to know him a little more.

2. Planificació de Git

L'estructura que farem servir a Git sera la següent:

La branca Main será on estara situada la nostra carpeta principal i d'on partiran totes les altres. Per els arxius de la pàgina web estan situats en una carpeta anomenada WebPage que tindrà la seva propia branca amb el mateix nom. En aquesta carpeta hi hauran els diferents apartats de la pàgina web (Portada, qui som, teclats…) totes amb una branca propia.

Dins d'aquestes carpetes tindran les carpetes que es solen fer servir per una página web (HTML,CSS,Images,Fonts). Aquestes carpetes no hauran de tindre una branca, pero si es dóna el cas que es fan modificacions específiques o especials que no es poden saber amb certesa si seran implementades, es crearà una branca per aquests arxius en especific (HTML_Portada). Un cop tots els canvis ja estiguin fets, caldrà fer merge entre la carpeta pare i la carpeta actual(És a dir, entre la branca Pare i la actual).
